EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dan Piotrowski on 28 September 2006.

2. The application has been amended as follows:

Regarding claims 1-15, before the word "station(s)" the term – end user – has been added.

3. The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claims is the inclusion of the limitations including a peer-to-peer communication network where after communication between stations each of the plurality of stations store historical information relating to a transmission parameter received during transmission. Utilizing the parameter history, the receiving station then adjusts its receiver prior to reception of a signal from a transmitting station. These limitations are found in all of the independent claims. And, the previously mentioned limitations are not found in the prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
